

# Instructions to install the Scroll Trellis Garden Trellis

## Scroll Trellis™

Easy to Install  
(Holds up to 50 lbs.)

- 1 Install the 1st bracket tight (with the Two buttons against the structure) —
- 2 Remove screw & (2) plastic buttons from loose bracket (careful not to drop pieces) and re-install buttons through the mesh at the desired trellis length
- 3 Pull bracket until mesh is straight, then start screw on slight angle until screw starts to bite (apply a caulking sealer on screw point when installing on a building)
- 4 With screw partially installed, rotate bracket so the mesh is tight, completely driving screw in place
- 5 Trim any excess loose mesh with household scissors
- 6 Mount the “Mid” Support Block to the mesh with the “Push-in” Buttons, then screw Block to structure

Instructions are included with every trellis.  
It installs in minutes with common tools and skills
