

Basket Booster 8-Strand Trellis for Container Gardening

The Basket Booster Trellis is a eight strand trellis that is assembled and added onto a container planter. The trellis is staked in the soil by the eight sturdy trellis stands. Solar Lights are included.

- The added trellis will guide climbing vines to grow into a large orb shape or the trellis may be strung with solar lights
- Stringing the trellis with solar lights will light up the plants at night with 80 total LED lights, automatically, add ambiance and outline the attractive shape of the trellis. Solar lights are available in warm white or bright white.
- During the day, the trellis adds a design feature that adds 2 feet to the height of the urn and is especially attractive with climbing vines such as Rhodochiton (Purple Bell Vine) Purple Rain, Thunbergia, Candy Corn Vine and Jasmine.
- This product is manufactured in America from food grade quality recycled polypropylene (BPA-free) with UV inhibitors. It is recyclable.
- Available colors are Black, Green or White
- Trellis assembly required (see overview below). The solar lights are strung onto the trellis, after the grower has assembled the trellis.
