- ❖ Pearls and Jade Pothos
- ❖ N Joy Pothos
- ❖ Philodendron Brasil
- ❖ Betel Leaf
- ❖ Wax Ivy
- ❖ Tradescantia
- ❖ Ivy
- ❖ Hoya
- ❖ more

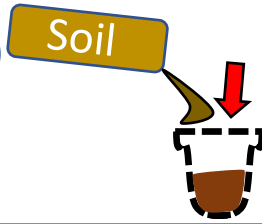

## Planting Instructions

1

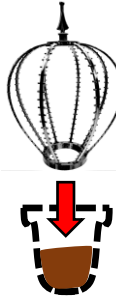

Start with a 6 inch wide planter pot

2

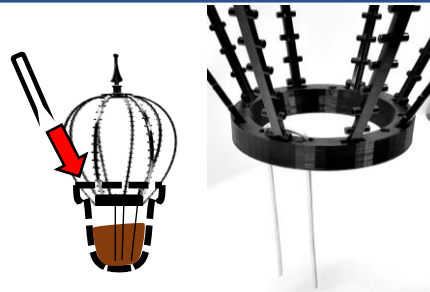

Fill planter pot half full with your desired "moist" potting soil

3

Center the Base of Trellis Assembly on top of the soil

4

Hold the Trellis straight up and insert the 4 Staples into the holes of the Base. Note: The staples may hit the bottom of the planter, this is OK.

5

Carefully compress soil down in the center to make a hole for the plant.

6

Transfer a 4" plant into the planter container to approx. 1 inch below the top of the planter container's rim. The Base is large enough to accommodate a 4 inch (10 cm) wide root ball, remove some soil on the root ball if needed.

7

Fill the top half the planter with soil to top of the plant's roots, this may cover the Base. If your plant has stems gently twist them around the trellis to train them to grow upwards.
