

ASSEMBLY INSTRUCTIONS for the Stack Trellis™ Triple Tier KIT

Parts Reference

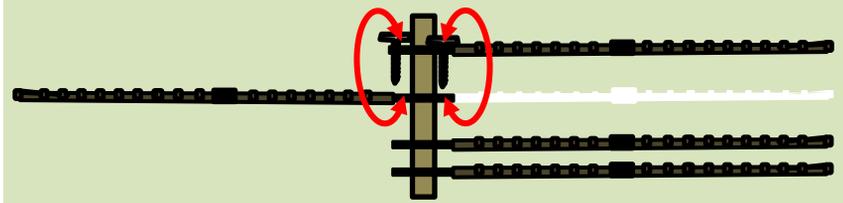

Your Kit will come assembled with (4) "X" parts, as above.

1

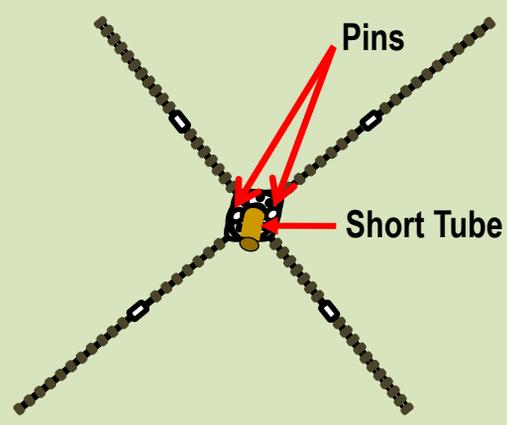

Hold one of the pre-assembled parts and rotate the 1st Leg that is adjacent to the Leg with Pins

2

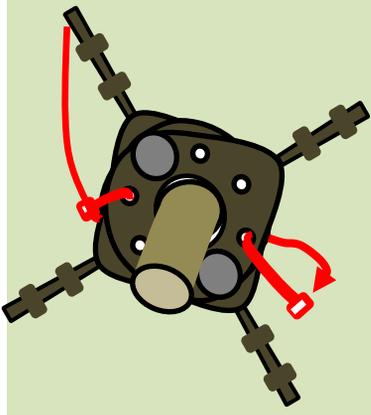

Align the small holes with the Pins and pinch together

3

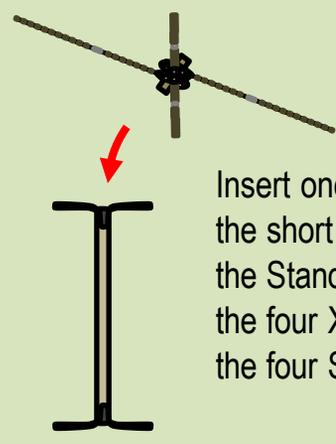

Continue to rotate the Legs and pinch together to form the first X shape.

4 Insert two Cable Ties through the Small Holes that are opposite each other on the Legs of the X. (Note: The correct way to connect the Cable Tie *(See Below)*

6 Insert one X Shape parts (with the short tube attached) into the Stand-Off Tube and align the four X's Legs with each of the four Stand-Off Tube Ends.

How to connect the Cable Tie Loop

Right
Insert on flat side

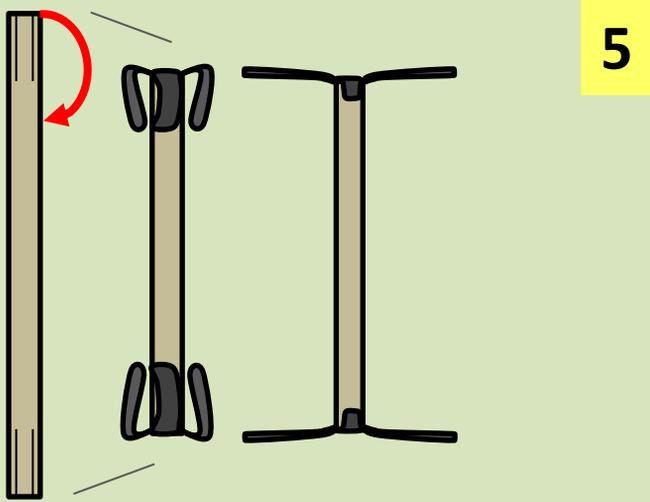

Wrong

Insert on the flat side

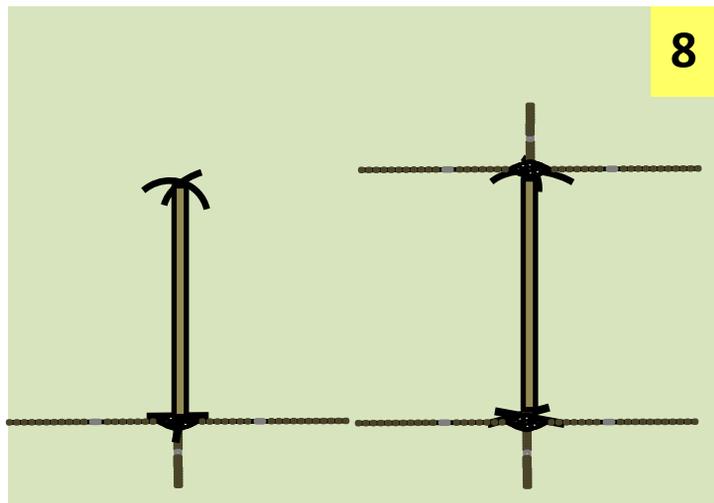

With the Small Tube still attached, pull the Cable tie loop to the outer edge, connect and trim the ends of the Cable Ties as needed. Repeat to the 3 remaining X shapes.

7

Attach all four Legs to the Stand-Off Tube Ends with Cable Ties (trim excess Cable Tie after tightening), remove the Small Tube

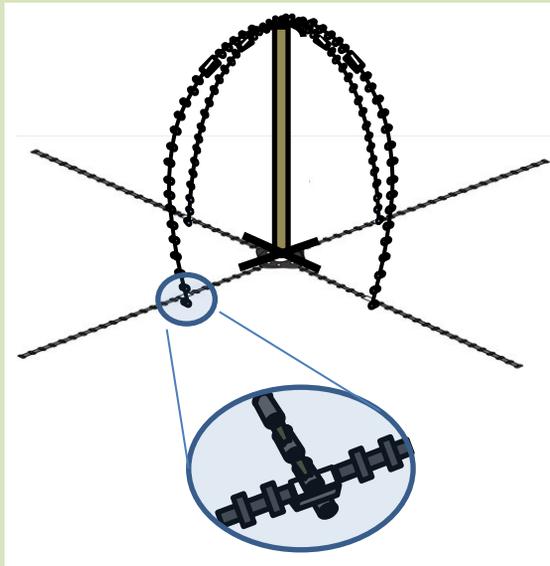

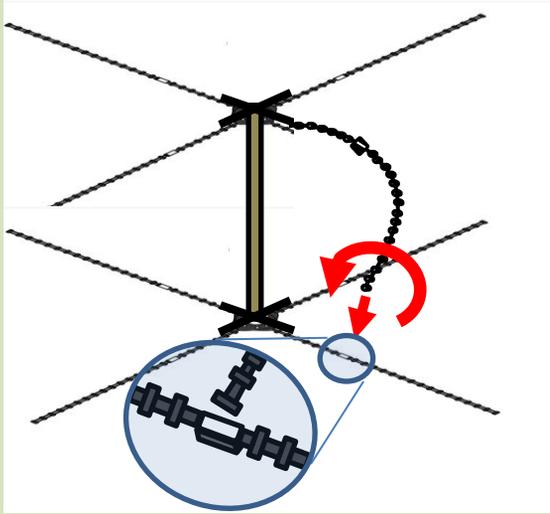

Peel back both ends of the Stand-Off Tube to create the "Stand-Off Tube Ends" (like peeling a banana)

Repeat Steps 6 and 7 to attach the next X Shape part onto the opposite end of the Stand-Off Tube..

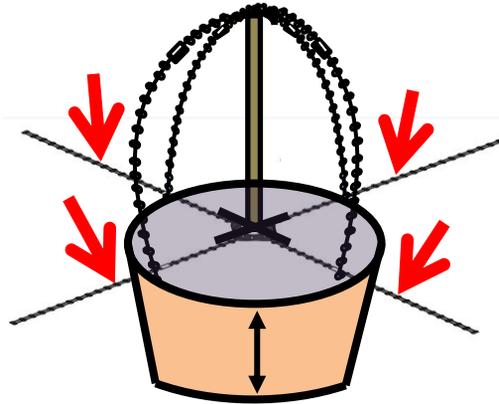

9

Twist the end of one of the X's Legs and insert into the Key Hole on the Bottom X, repeat with the remaining 3 Legs. Place your assembled Trellis either on top of your container, or in the garden.

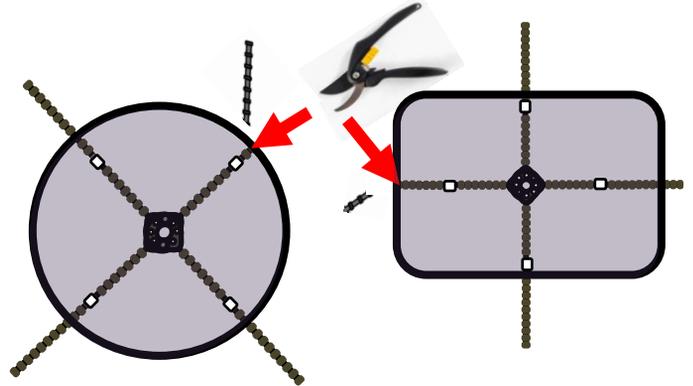

10

Trim the Legs of Bottom X (as shown below) so that they fit inside wall of container or if using in the garden, trim the legs to about 10 inches (keeping the Key Hole).

Trim all 4 of these Legs

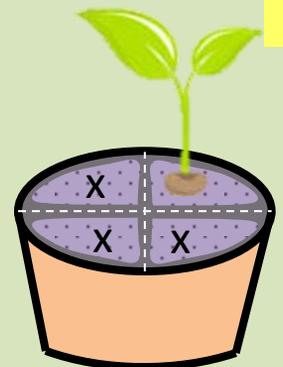

Minimum 12" Deep Pot

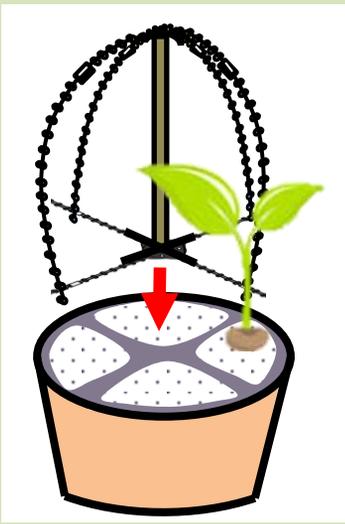

Set the Trellis aside and proceed to planting as shown in Step 11

11

Plant in quadrants in your container or in the soil, allowing room for the assembled X's Legs. If planting a single plant, place the plant closer to the center.

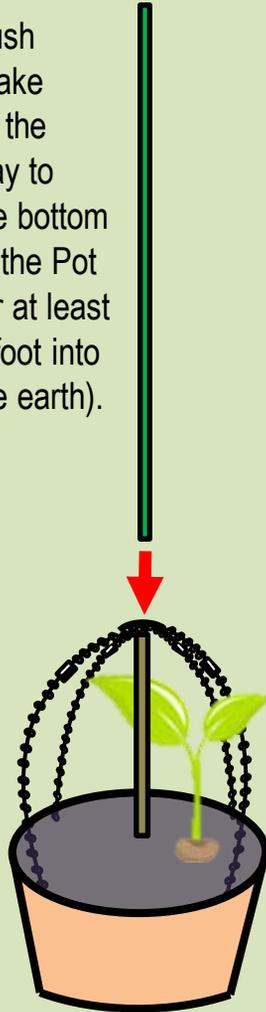

12

Replace the assembled trellis in the container or in the garden and cover the bottom X's Legs with at least 2 inches of soil.

**13**

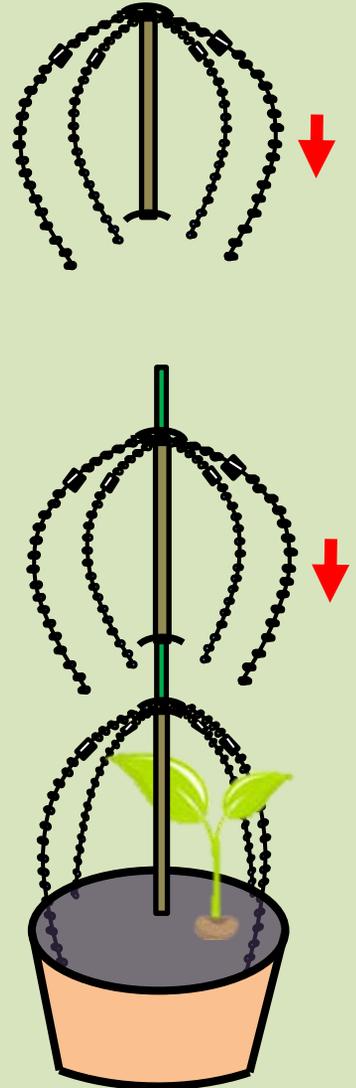

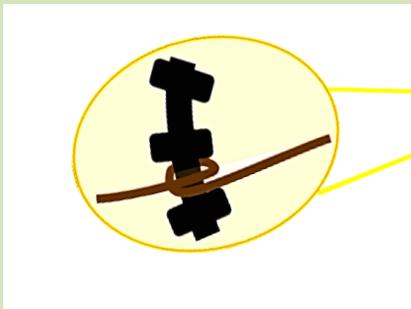

Add a 3/4" diameter x 5' stake down the Stand-Off Tube.

Push Stake all the way to the bottom of the Pot (or at least a foot into the earth).

**14**

Build trellis height "tier by tier" repeating Steps 1 through 7.

Slide the Stand-Off Tube over the stake and secure the 4 Stand-Off Tube legs with Cable Ties and the X legs into the Key Holes on top of lower trellis per Step 7 & 9.

**15**

If your plant does not climb and you are using the trellis for a plant cage, simply add some twine! Wrap the twine around each Leg as shown and additional cross strings if more support is desired.
