

ASSEMBLY INSTRUCTIONS for the Stack Trellis™ STARTER KIT

Parts Reference

1

Short Tube

Hold one of the pre-assembled parts and rotate the 1st Leg that is adjacent to the Leg with Pins

2

Align the small holes with the Pins and pinch together

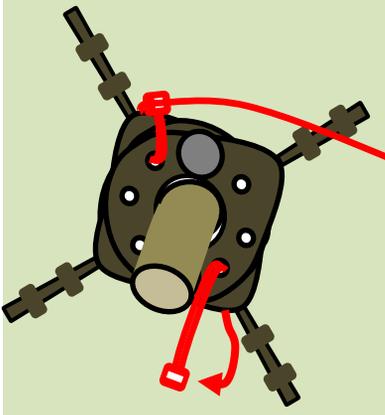

3

Pins

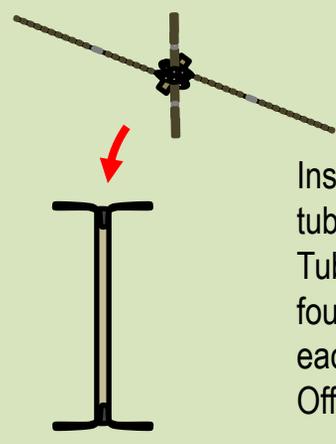

Short Tube

Continue to rotate the Legs and pinch together to form the Star.

Your Kit will come assembled with two parts shown above

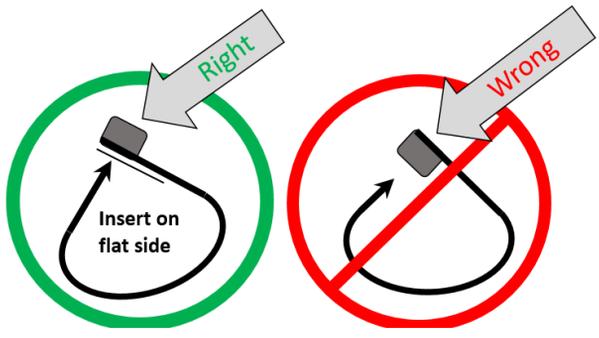

4
 Insert two Cable Ties through the Small Holes that are opposite each other on the Legs of the Star, repeat for the second Star. (Note: The correct way to connect the Cable Tie (See Below)

6
 Insert one Star's short tube into the Stand-Off Tube and align the four Star's Legs with each of the four Stand-Off Tube Ends.

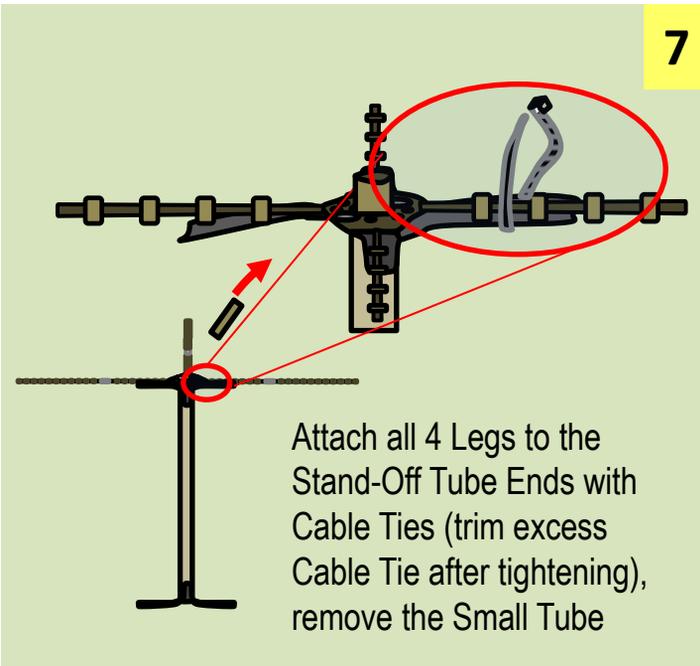

How to connect the Cable Tie Loop

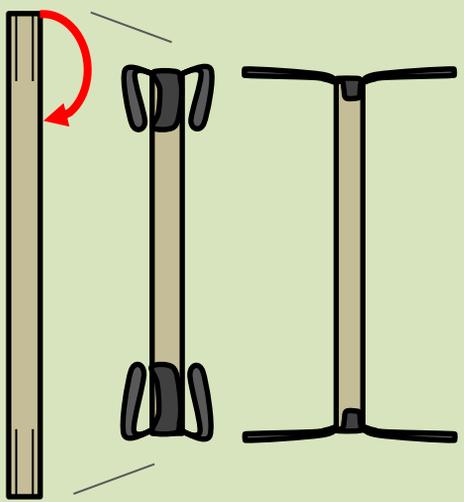

Insert on the flat side

Repeat Steps 1-4 to assemble the second Star

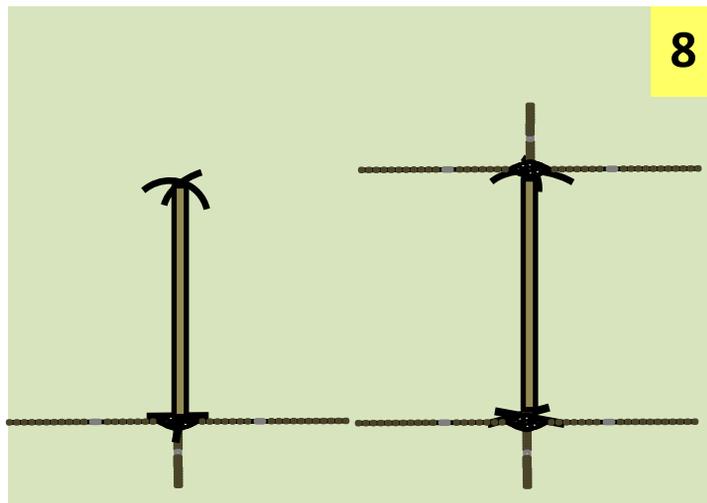

Note: Keep the Short Tube in both the Stars

7
 Attach all 4 Legs to the Stand-Off Tube Ends with Cable Ties (trim excess Cable Tie after tightening), remove the Small Tube

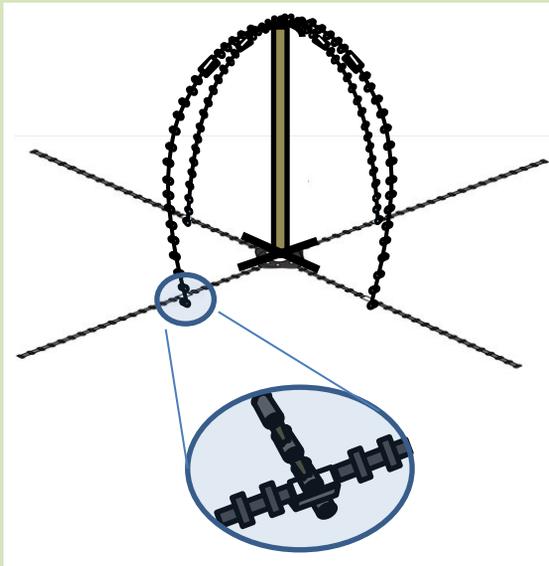

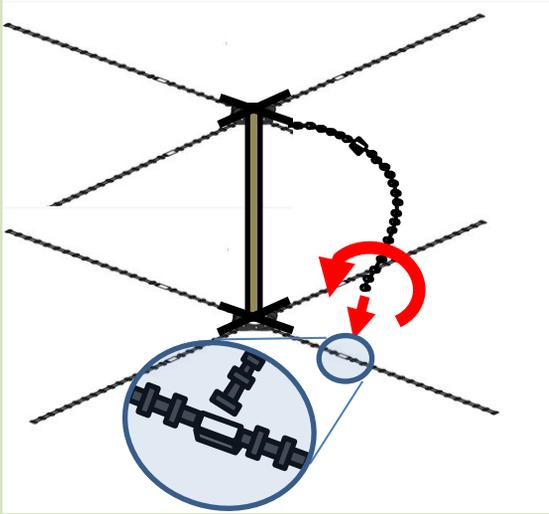

5
 Peel back both ends of the Stand-Off Tube to create the "Stand-Off Tube Ends" (like peeling a banana)

8
 Repeat Steps 6 and 7 to attach the second Star Assembly on opposite end of the Stand-Off Tube..

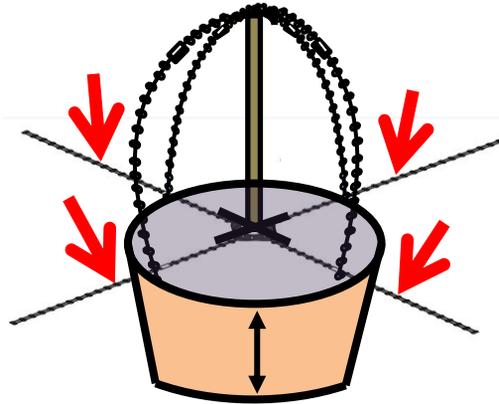

9

Twist the end of one of the Star's Legs and insert into the Key Hole on the Bottom Star, repeat with the remaining 3 Legs.
Place your assembled Trellis either on top of your container, or in the garden.

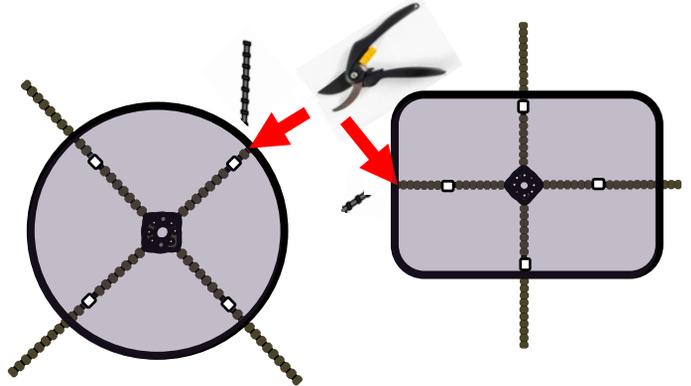

10

Trim the Legs of Bottom Star (as shown below) so that they fit inside wall of container or if using in the garden, trim the legs to about 10 inches (keeping the Key Hole).

Trim all 4 of these Legs

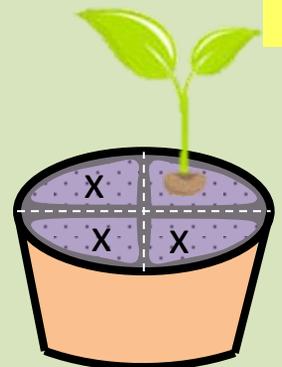

Minimum 12" Deep Pot

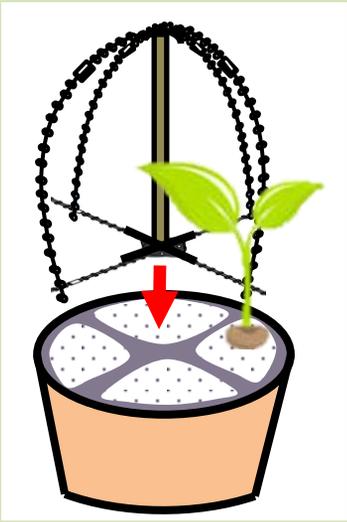

Set the Trellis aside and proceed to planting as shown in Step 11

11

Plant in quadrants in your container or in the soil, allowing room for the assembled Star's Legs. If planting a single plant, place the plant closer to the center.

12

Add a 3/4" diameter x 5' stake down the Stand-Off Tube.

Push Stake all the way to the bottom of the Pot.

Replace the assembled trellis in the container or in the garden and cover the bottom Star Legs with at least 2 inches of soil.

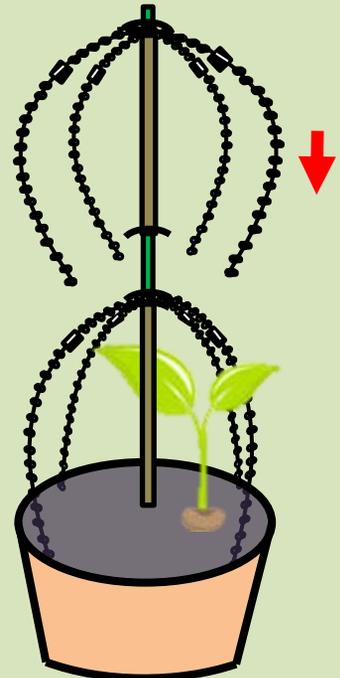

13

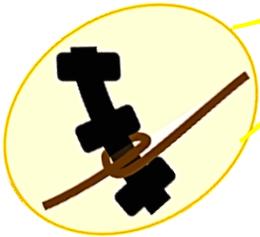

14

Build another trellis tier by repeating Steps 1 through 7.

Slide Stand-Off Tube over stake and secure the 4 Stand-Off Tube legs with Cable Ties and the Star legs into the Key Holes on top of lower trellis per Step 7 & 9.

15

If your plant does not climb and you are using the trellis for a plant cage, simply add some twine! Wrap the twine around each Leg as shown and additional cross strings if more support is desired.

Note: A climbing plant will stop growing when they reach the top of the trellis or start to wrap around itself... Not to worry, Scroll Trellis has the **Add A Stack™** trellis product which is made to simply "Stack As It Grows™" to quickly add height to this trellis!

The **Add A Stack™** Trellis is sold separately. **Patent Pending**
