

Retail Solar Light Packs with Battery Backup

4 light string solar light strings: The LED are on 4 strands; each are 28 inches long with 20 lights on each strand spaced approximately every 1.5 inches. The light strings extend from a central solar panel that has a AA battery backup. (The battery is not included).

8 light string solar light strings: The LED lights are on 8 strands; each are 28 inches long with 10 lights on each strand spaced approximately every 3 inches. The light strings extend from a central solar panel that has a AA battery backup. (The battery is not included).

On either product:

Each strand of lights are strung on copper wire for outdoor use. Lights are cool to the touch. The solar lights have a 2 year lifespan.

The leading wire connecting the solar panel to the light strings is 3 feet long which allows the solar panel placement to be adjusted as the plant grows. A stake is included with the lights so that the solar panel may be staked in the soil if desired.

The solar panel/battery box has a 2-way power switch which allows the lights to be turned off, if desired. The lights have a 2 option function for either steady-on lights or flashing lights.

Fully charged lights light up automatically and remain on for approximately 6 hrs.

| SKU | UPC | Description Choose the number of strings based on the number of trellis strands | Solar Lights | MSRP per Unit |
|----------------|--------------|--|--------------|------------------|
